

Town of Saxis, VA

Keep it to about 15 min max.

Have 2 - 3 different client websites that look different. Show them how they can change things. Emphasize the following. Preferably one that has ordinances.

1. Customizable websites for small communities
2. This is our market - smaller communities
3. The navigation is customizable. The whole solution is designed for small communities who update things themselves. All training is provided. And support is unlimited which is good to consider down the road if Jim is unavailable.
4. Show the differences between the different Cities websites.
5. Show how to upload a doc or two. Tell them the process is the same if they want to upload an image.
6. Jim will indicate if he wants me to mention or demo an alert and or discuss online bill pay or anything else.
